Defender TUNES

Bluetooth Ear Muffs

Fitting Instructions

1. Place the ear defenders on the head with the band at the crown (top) of the head.
2. Pull out the cups and place the hearing protector over your ears so the ear cushions fit snugly.
3. It is important that the cups fully enclose the ears and that the cushions exert pressure around the ears.
4. Adjust the height of both cups for comfort and a good seal - do this by evenly sliding the cups up or down.

Important: For a proper fit, the ear cushion should seal firmly against the head. Anything that interferes with the seal such as long hair (pull back, to the extent possible), thick or poorly fitting eyeglasses at the temples, pencils or caps will lessen the earmuffs effectiveness.

Do not bend and reshape the headband, as this will cause a loose fit and sound leakage.

NNR (Noise Reduction Rate)

For Example

1. The environment noise level as measured at the air is 92db.
2. The NRR is 25 decibels.
3. The level of noise entering the ear is approximately equal to 67db.

Standards

Hearing protector class 4 tested to AS/NZS 1270.

These imported earmuffs are supported by certified protection of ANSI S3.19-1974 (American National Standards Institute) and CEEN 352-1 (European standard), recommended for hunting, mowing, woodworking, aircraft, chainsaw, gardening, fireworks, and machining, as well as other noisy conditions.

Limited Warranty

Defender NZ warrants this product to the original purchaser to be free from defects in material and workmanship, under normal use and conditions for a period of one year from the date of purchase.

Under this warranty, this unit will be replaced at our option. Copy of original receipt or gift receipt is required for any warranty service. To enact the warranty, the customer is required to contact our Customer Service Group. DefenderEarmuffs.co.nz
